Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26, 67-96, and 104-114, drawn to machine implemented method for deriving a sequence of at least a portion of an oligomer from mass spectrum data of fragments of said oligomer, classified in class 702, subclass 19.
 - II. Claims 27-52, drawn to machine-readable medium containing executable computer program instructions, classified in class 702, subclass 19.
 - III. Claims 53-66, drawn to method for processing noise in a mass spectrum data of a fragmented oligomer, classified in class 702, subclass 19.
 - IV. Claims 97-103, drawn to method for preparing mass spectrum data to extract specific ions of interest, classified in class 436, subclass 94.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are all drawn to different methods, which are comprised of different method steps and result in different end products.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and/or have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1634

5. In the event that the invention of Group I is elected, the following election of patentably-distinct species is applied.

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Protein (claims 2-12, 14-26, 68-71, 73-77, 80, 83, 113, and 114)
- b. Oligosaccharide (claims 85-90, 105, and 112);
- c. Nucleic acid (claims 91-96, 104, 109-111).

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 13, 67, 72, 78, 79, 81-82, 84, 107, and 108 are generic. Also, claim 106 is considered to be a linking claim between species a-c, above, and will be considered to the extent that it reads on the elected species.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1634

10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is (571) 272-0751. The examiner can normally be reached on 6:30 a.m. to 5 p.m., Monday through Thursday.

13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones can be reached on (571) 272-0745. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
